3. CHAIRMAN'S LETTER

Dear Shareholder,

On 13 April your Board announced the successful completion of the Placement of new shares in the Company to raise in excess of A\$1 million. As a fellow Shareholder, it is my pleasure to invite you to participate in a shareholder purchase plan which provides the Company's existing Shareholders the opportunity to acquire up to 40,000,000 SPP Shares in the Company on the same terms as the Placement, including the issue of one free attaching option for every two SPP Shares acquired.

Your Board remains confident that the outlook for the uranium price remains bright, with China's concern over carbon emissions underpinning a wave of new nuclear reactor construction like never experienced before. In addition, the process to restart a number of nuclear reactors in Japan is underway, and we expect to see a large increase in the uranium contracting activities of utilities. Together these factors underpin a continued strengthening of the uranium price.

The Company is focussed on capitalising on the upswing in demand for uranium with the Company's activities focused on the Tiris Uranium project in Mauritania. In 2014, the Company delivered a scoping study on the Tiris project which demonstrated Tiris' low capital requirements and low, competitive operating costs.

The scoping study demonstrated that the capital requirement for the Tiris project is \$US45 million for an initial 15 year mine life at a low cash cost of US\$30/lb, which is below many of our peers.

The project has some excellent natural attributes which reduce the process plant footprint substantially, eliminate grinding and allow fast leaching which, along with a mine depth of only 5 metres, is the reason we are proceeding straight to carrying out a feasibility study (**Tiris Feasibility Study**).

The Company's other project, Häggån, has potential to be a major source of European uranium and whilst displaced in timing by our enthusiasm for Tiris, it is by no means forgotten or sidelined. As one of the world's largest undeveloped uranium projects it is a stunning longer term development project for the Company, providing Shareholders with significant leverage to a rising uranium price.

The Company is committed to getting the Tiris project into production, whilst minimising dilution to Shareholders. To achieve this goal, the Company has established a number of key milestones, including:

- advance the Tiris Feasibility Study in an expedient and cost effective manner;
- optimise the economics of the Tiris project with significant potential to increase the scale and further reduce the operating costs of the Tiris project;
- progress project funding discussions with potential strategic and offtake partners;
- increase the profile of the Company among both the investment community and the uranium industry globally; and

- closing the glaring valuation gap between the Company and some of its closest peer uranium companies.

2015 has seen a new management team take on the running of the Company with a strong commercial drive and focus. The Company does not apologise for driving forward as hard as it prudently can to progress the development of its excellent assets.

I would like to thank shareholders both new and old for their ongoing support and commend to you this opportunity to participate in the Share Purchase Plan offering. It is an exciting time for the Company and we look forward to your continued support as we move to the next exciting phase for the Company.

4. DETAILS OF THE OFFERS

4.1 Background

On 13 April 2015, the Company announced it had received commitments for a placement to raise in excess of \$1,000,000 to fund the definitive feasibility study for the development of the high-grade Tiris Uranium Project through the issue of 40,762,340 Shares at an issue price of \$0.025 per Share (**Placement Shares**) (together with 1 for 2 free-attaching listed Options exercisable at \$0.05 on or before the date which is 24 months from the date of issue) (**Placement Options**) (**Placement**).

Further, the Company also announced its intention to raise up to a further \$1,000,000 whereby shareholders registered on the Company's share register on 10 April 2015 and having an Australian address (**Eligible Shareholders**) would be provided the opportunity to subscribe for Shares and Options under a share purchase plan on the same terms as the Placement through the issue of 40,000,000 Shares (**SPP Shares**) at an issue price of \$0.025 per Share (together with 1:2 free-attaching listed Options exercisable at \$0.05 on or before the date which is 24 months from the date of issue (**SPP Options**)) (**SPP Offer**).

The Placement Shares were issued under the Company's available placement capacity on 23 April 2015.

The issue of the Placement Options, SPP Shares and the SPP Options are subject to Shareholder approval being obtained at a meeting of shareholders proposed to be held on 10 June 2015 (**General Meeting**).

This Prospectus makes the offer of:

- (a) the free-attaching Placement Options to subscribers of Placement Shares under the Placement on a pro rata basis (**Placement Offer**); and
- (b) the offers of the SPP Shares and SPP Options under the SPP Offer.

4.2 The Offers

By this Prospectus, the Company offers for subscription:

- (a) for nil cash consideration, 20,381,170 Placement Options pursuant to the Placement Offer;
- (b) up to 40,000,000 SPP Shares at an issue price of \$0.025 per Share to raise up to \$1,000,000 together with up to 20,000,000 SPP Options on the basis of one (1) free SPP Option for every two (2) Shares subscribed for pursuant to the SPP Offer.

Up to approximately \$1,000,000 will be raised by the issue of the SPP Shares and SPP Options pursuant to the SPP Offer. Eligible Shareholders will be entitled to apply for up to \$15,000 worth of SPP Shares under the SPP Offer.

No funds will be raised from the issue of the Placement Options or the SPP Options pursuant to this Prospectus as the Placement Options and SPP Options are issued free attaching to the Placement Shares and SPP Shares respectively.

All of the Placement Options and SPP Options offered under this Prospectus will be granted on the terms and conditions set out in Section 6.1 of this Prospectus.

All of the Shares issued upon the future exercise of the Placement Options and SPP Options offered under this Prospectus will rank equally with the Shares on issue at the date of this Prospectus. Please refer to Section 6.2 for further information regarding the rights and liabilities attaching to the Shares.

4.3 Conditional Offers

The issue of the Placement Options and the issue of SPP Shares and SPP Options pursuant to the SPP Offer are conditional upon the Company obtaining shareholder approval to issue the relevant Securities at the General Meeting. If Shareholder approval is not obtained for the SPP Offer, all application monies will be refunded as soon as practicable.

4.4 Minimum subscription

There is no minimum subscription for the Offers.

4.5 Applications

Placement Subscribers may apply for the Placement Offer by completing the Placement Offer application form (**Placement Application Form**) accompanying this Prospectus in accordance with the instructions outlined on the Placement Application Form. Applications pursuant to the Placement Offer must only be made by those investors who participated in the Placement by subscribing for Placement Shares under the Placement Offer.

An application for SPP Shares and SPP Options under the SPP Offer must be made on the prescribed SPP acceptance form accompanying this Prospectus (**SPP Acceptance Form**). Pursuant to the SPP Offer, Eligible Shareholders may apply for up to a maximum of \$15,000 worth of Shares in amounts of \$2,000, \$5,000 and \$15,000 (equivalent to a maximum of 40,000,000 SPP Shares and 20,000,000 free-attaching SPP Options) by completing the SPP Acceptance Form in accordance with the instructions outlined on the SPP Acceptance Form. Applications pursuant to the SPP Offer must only be made by Eligible Shareholders.

Any investors may apply for SPP Shortfall Securities by completing the SPP Shortfall Securities application form (**Shortfall Securities Application Form**) (it is not a requirement that applicants need to be a Shareholder or an Eligible Shareholder) in accordance with the instructions outlined on the Shortfall Securities Application Form. The Company cannot guarantee that any applicant will receive any of the SPP Shortfall Securities subscribed for. The Directors reserve the right to issue the SPP Shortfall Securities in their sole discretion, including not to issue, or to scale back applications for SPP Shortfall Securities in their sole discretion.

4.6 Shortfall Offer

Any SPP Shares (and SPP Options) not taken up pursuant to the SPP Offer (**SPP Shortfall Securities**) will form the Shortfall Offer (**Shortfall Offer**) which is made by the Company to all investors by way of this Prospectus.

The Shortfall Offer is a separate offer made pursuant to this Prospectus and will remain open for up to three months following the SPP Closing Date.

The Company will issue one SPP Option for every two (2) SPP Shares subscribed for by an investor under the Shortfall Offer.

The issue price for each Share to be issued under the Shortfall Offer shall be \$0.025 being the price at which SPP Shares have been offered under the SPP Offer and the price of the SPP Options will be nil as they are free attaching to the SPP Shares.

There is no maximum limit on the number of Shares that an investor may apply for under the Shortfall Offer.

The Shortfall Offer is conditional upon the Company obtaining shareholder approval to issue the relevant Shortfall Securities at the General Meeting. If Shareholder approval is not obtained for the SPP Offer, all application monies will be refunded as soon as practicable.

The Directors reserve the right to issue SPP Shortfall Securities at their absolute discretion and may issue to an applicant a scaled back, lesser number of, or no, SPP Shortfall Securities than the number for which the applicant applies for on the Shortfall Securities Application Form. Further details on how to apply for SPP Shortfall Securities are set out in Section 4.5 and in the accompanying Shortfall Securities Application Form.

4.7 Payment by cheque/bank draft

All cheques in respect of the SPP Offer must be drawn on an Australian bank or bank draft made payable in Australian currency to "Aura Energy Limited" and crossed "Not Negotiable".

Your completed SPP Acceptance Form and cheque must reach the Company's share registry no later than 5.00pm WST on the SPP Closing Date.

4.8 Payment by BPAY® for SPP Offer

For payment by BPAY®, please follow the instructions on the SPP Acceptance Form. You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions. Please note that should you choose to pay by BPAY®:

- (a) you do not need to submit the SPP Acceptance Form but are taken to have made the declarations on that SPP Acceptance Form; and
- (b) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your application monies.

It is your responsibility to ensure that your BPAY® payment is received by the share registry by no later than 4.00pm (WST) on the SPP Closing Date. You should be aware that your financial institution may implement earlier cut-off times with regards to electronic payment and you should therefore take this into consideration when making payment. Any application monies received for more than your final allocation of Shares (only where the amount is \$1.00 or greater) will be refunded. No interest will be paid on any application monies received or refunded.

The SPP Options and Placement Options will only be listed in the event that the ASX listing conditions are met.

The fact that ASX may grant Official Quotation to the SPP Shares, SPP Options and Placement Options is not to be taken in any way as an indication of the merits of the Company or the Shares and Options now offered for subscription.

4.12 Clearing House Electronic Sub-Register System (CHESS) and Issuer Sponsorship

The Company will not be issuing Share and Option certificates. The Company is a participant in CHESS, for those investors who have, or wish to have, a sponsoring stockbroker. Investors who do not wish to participate through CHESS will be issuer sponsored by the Company. Because the sub-registers are electronic, ownership of securities can be transferred without having to rely upon paper documentation.

Electronic registers mean that the Company will not be issuing certificates to investors. Instead, investors will be provided with a statement (similar to a bank account statement) that sets out the number of Shares and/or Options allotted to them under this Prospectus. The notice will also advise holders of their Holder Identification Number or Security Holder Reference Number and explain, for future reference, the sale and purchase procedures under CHESS and issuer sponsorship.

Further monthly statements will be provided to holders if there have been any changes in their security holding in the Company during the preceding month.

Shares issued on exercise of the Options rank equally with the then issued shares of the Company.

(i) **Reconstruction of capital**

If at any time the issued capital of the Company is reconstructed, all rights of an Optionholder are to be changed in a manner consistent with the Corporations Act and the ASX Listing Rules at the time of the reconstruction.

(j) **Participation in new issues**

There are no participation rights or entitlements inherent in the Options and holders will not be entitled to participate in new issues of capital offered to Shareholders during the currency of the Options without exercising the Options.

(k) **Change in exercise price**

An Option does not confer the right to a change in Exercise Price or a change in the number of underlying securities over which the Option can be exercised.

(l) **Quoted**

The Company will apply for quotation of the Options on ASX.

(m) **Transferability**

The Options are transferable subject to any restriction or escrow arrangements imposed by ASX or under applicable Australian securities laws.

6.2 Shares

The following is a summary of the more significant rights and liabilities attaching to Shares (being the underlying securities of the free-attaching Options to be issued pursuant to this Prospectus). This summary is not exhaustive and does not constitute a definitive statement of the rights and liabilities of Shareholders.

Full details of the rights and liabilities attaching to Shares are set out in the Constitution, a copy of which is available for inspection at the Company's registered office during normal business hours.

(a) **General meetings**

Shareholders are entitled to be present in person, or by proxy, attorney or representative to attend and vote at general meetings of the Company.

Shareholders may requisition meetings in accordance with section 249D of the Corporations Act and the Constitution of the Company.

(b) **Voting rights**

Subject to any rights or restrictions for the time being attached to any class or classes of shares, at general meetings of shareholders or classes of shareholders:

- (i) each Shareholder entitled to vote may vote in person or by proxy, attorney or representative;
- (ii) on a show of hands, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder has one vote; and
- (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder shall, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for each Share held, but in respect of partly paid shares shall have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) **Dividend rights**

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which shall be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

The Directors may from time to time pay to the Shareholders any interim dividends as they may determine. No dividend shall carry interest as against the Company. The Directors may set aside out of the profits of the Company any amounts that they may determine as reserves, to be applied at the discretion of the Directors, for any purpose for which the profits of the Company may be properly applied.

Subject to the ASX Listing Rules and the Corporations Act, the Company may, by resolution of the Directors, implement a dividend reinvestment plan on such terms and conditions as the Directors think fit and which provides for any dividend which the Directors may declare from time to

time payable on Shares which are participating Shares in the dividend reinvestment plan, less any amount which the Company shall either pursuant to the Constitution or any law be entitled or obliged to retain, be applied by the Company to the payment of the subscription price of Shares.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution, divide among the Shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as he considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

The liquidator may, with the authority of a special resolution, vest the whole or any part of any such property in trustees upon such trusts for the benefit of the contributories as the liquidator thinks fit, but so that no Shareholder is compelled to accept any shares or other securities in respect of which there is any liability.

(e) **Shareholder liability**

As the Shares issued will be fully paid shares, they will not be subject to any calls for money by the Directors and will therefore not become liable for forfeiture.

(f) **Transfer of shares**

Generally, shares in the Company are freely transferable, subject to formal requirements, the registration of the transfer not resulting in a contravention of or failure to observe the provisions of a law of Australia and the transfer not being in breach of the Corporations Act and the ASX Listing Rules.

(g) **Future increase in capital**

The issue of any new Shares is under the control of the Directors of the Company. Subject to restrictions on the issue or grant of Securities contained in the ASX Listing Rules, the Constitution and the Corporations Act (and without affecting any special right previously conferred on the holder of an existing share or class of shares), the Directors may issue Shares as they shall, in their absolute discretion, determine.

(h) **Variation of rights**

Under section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to shares.

If at any time the share capital is divided into different classes of shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(i) **Alteration of constitution**

In accordance with the Corporations Act, the Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.

7. RISK FACTORS

7.1 Introduction

The Shares and Options offered under this Prospectus are considered speculative. An investment in the Company is not risk free and the Directors strongly recommend potential investors to consider the risk factors described below, together with information contained elsewhere in this Prospectus and to consult their professional advisers before deciding whether to apply for Shares and Options pursuant to this Prospectus.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this section, or other risk factors, may have a material impact on the financial performance of the Company and the market price of the Shares and Options.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

7.2 Company specific

(a) Uranium risk

The Company is involved in exploring for uranium. Uranium mining is subject to extensive regulation by governments.

Nuclear energy is in direct competition with other more conventional sources of energy, which include gas, coal and hydro-electricity. Furthermore, any potential growth of the nuclear power industry (with any potential attendant increase in the demand for uranium) beyond its current level will depend on continued and increased acceptance of nuclear technology as a means of generating electricity.

The nuclear industry is currently subject to some negative public opinion owing to political, technological and environmental factors. This may have an adverse impact on the demand for uranium and increase the regulation of uranium mining.

(b) Sovereign Risk

The Company's key project is located in Mauritania which is considered to be a developing country and, as such, subject to emerging legal and political systems compared with the system in place in Australia.

Possible sovereign risks include, without limitation, changes in the terms of mining legislation, changes to royalty arrangements, changes to taxation rates and concessions and changes in the ability to enforce legal rights. Any of these factors may, in the future, adversely affect the financial performance of the Company and the market price of its shares.

No assurance can be given regarding future stability in this or any other country in which the Company may have an interest.

7.3 General Risks

(a) Operating

The operations of the Company may be affected by various factors, including failure to locate or identify uranium reserves, failure to achieve predicted metal or mineral product production rates, operational and technical difficulties encountered in production, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

No assurances can be given that the Company will achieve commercial viability through the successful evaluation and/or production of its project interests.

(b) Economic

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

(c) Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) interest rates and inflation rates;
- (iii) changes in investor sentiment toward particular market sectors;
- (iv) the demand for, and supply of, capital; and
- (v) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration stocks in particular. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(d) Dividends

Any future determination as to the payment of dividends by the Company will be at the discretion of the Directors and will depend on the financial condition of the Company, future capital requirements and general business and other factors considered relevant by the Directors. No assurance in relation to the payment of dividends or franking credits attaching to dividends can be given by the Company.

(e) **Taxation**

The acquisition and disposal of Shares and Options will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares and Options from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares and Options under this Prospectus.

(f) **Reliance on key personnel**

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

(g) **Speculative Investments**

Mineral exploration and mining are speculative operations that may be hampered by circumstances beyond the control of the Company. Profitability depends on successful exploration and/or acquisition of reserves, design and construction of efficient processing facilities, competent operation and management and proficient financial management. Project development in itself is a speculative endeavour, while mining operations can be hampered by force majeure circumstances and cost overruns for unforeseen events.

(h) **Exploration, Mining and Evaluation Risks**

The success of the Company depends on the delineation of economically mineable reserves from its resources, access to required development capital, movement in the price of commodities, securing and maintaining title to the Company's exploration and mining tenements and obtaining all consents and approvals necessary for the conduct of its exploration, development and mining activities.

Exploration, evaluation and development on the Company's existing exploration and mining tenements may be unsuccessful, resulting in a reduction of the value of those tenements, diminution in the cash reserves of the Company and possible relinquishment of the exploration and mining tenements.

(i) **Commodity Price and Exchange Rate Risks**

To the extent the Company is involved in mineral production the revenue derived through the sale of commodities may expose the potential income of the Company to commodity price and exchange rate risks. Commodity prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations for precious and base metals, technological advancements, forward selling activities and other macro-economic factors.

Furthermore, international prices of various commodities are denominated in US dollars, whereas the income and expenditure of the Company are and will be taken into account in Australian currency, exposing the Company to the fluctuations and volatility of the exchange rate between the US dollar and the Australian dollar as determined in international markets.

(j) **Environmental Risks**

The operations and proposed activities of the Company are subject to the laws and regulation of all jurisdictions in which the Company is operating concerning the environment. As with most exploration projects and mining operations, the Company's activities are expected to have an impact on the environment, particularly if advanced exploration or mine development proceeds. The Company attempts to conduct its activities to the highest standard of environmental obligation, including compliance with all environmental laws.

(k) **Native Title and Title Risks**

Interests in tenements are governed by the respective legislation in the jurisdiction in which the Company's tenements are located, and are evidenced by the granting of licences or leases. Each licence or lease is for a specific term and carries with it annual expenditure and reporting commitments, as well as other conditions requiring compliance. Consequently, the Company could lose title to or its interest in tenements if licence conditions are not met or if insufficient funds are available to meet expenditure commitments.

It is also possible that, in relation to tenements which the Company has an interest in or will in the future acquire such an interest; there may be areas over which legitimate common law native title rights exist. If native title rights do exist, the ability of the Company to gain access to tenements (through obtaining consent of any relevant landowner), or to progress from the exploration phase to the development and mining phases of operations may be affected.

(l) **Joint Venture Parties, Agents and Contractors**

The Directors are unable to predict the risk of financial failure or default by a participant in any joint venture to which the Company is or may become a party or the insolvency or managerial failure by any of the contractors used by the Company in any of its activities or the insolvency or other managerial failure by any of the other service providers used by the Company for any activity.

(m) **Future Capital Requirements**

The Company's activities will require substantial expenditures. There can be no assurances that the Company will have sufficient capital resources, or that it will be able to obtain additional resources on terms acceptable to the Company or at all. Any additional equity financing may be dilutive to shareholders and any debt financing if available may involve restrictive covenants, which limit the Company's operations and business strategy. The Company's failure to raise capital if and when needed could delay or suspend the Company's business strategy and could have a material adverse effect on the Company's activities.

(n) **Potential Acquisitions**

As part of its business strategy, the Company may make acquisitions of or significant investments in companies, products, technologies or resource projects. Any such future transactions would be accompanied by the risks commonly encountered in making acquisitions of companies, products or resource projects.

(o) **Resource Estimations**

Resource estimates are expressions of judgment based on knowledge, experience and resource modelling. As such, resource estimates are inherently imprecise and rely to some extent on interpretations made. Despite employing qualified professionals to prepare resource estimates, such estimates may nevertheless prove to be inaccurate. Furthermore, resource estimates may change over time as new information becomes available. Should the Company encounter mineralisation or geological formations different from those predicted by past drilling, sampling and interpretations, resource estimates may need to be altered in a way that could adversely affect the Company's operations.

7.4 Investment speculative

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Securities offered under this Prospectus

Therefore, the Securities to be issued pursuant to this Prospectus carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those Securities.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Securities pursuant to this Prospectus.

8. ADDITIONAL INFORMATION

Specifically, like all listed companies, the Company is required to continuously disclose any information it has to the market which a reasonable person would expect to have a material effect on the price or the value of the Company’s securities.

This Prospectus is a “transaction specific prospectus”. In general terms a “transaction specific prospectus” is only required to contain information in relation to the effect of the issue of securities on a company and the rights attaching to the securities. It is not necessary to include general information in relation to all of the assets and liabilities, financial position, profits and losses or prospects of the issuing company.

This Prospectus is intended to be read in conjunction with the publicly available information in relation to the Company which has been notified to ASX and does not include all of the information that would be included in a prospectus for an initial public offering of securities in an entity that is not already listed on a stock exchange. Investors should therefore have regard to the other publicly available information in relation to the Company before making a decision whether or not to invest.

Having taken such precautions and having made such enquires as are reasonable, the Company believes that it has complied with the general and specific requirements of ASX as applicable from time to time throughout the 3 months before the issue of this Prospectus which required the Company to notify ASX of information about specified events or matters as they arise for the purpose of ASX making that information available to the stock market conducted by ASX.

Information that is already in the public domain has not been reported in this Prospectus other than that which is considered necessary to make this Prospectus complete.

The Company, as a disclosing entity under the Corporations Act states that:

- (a) it is subject to regular reporting and disclosure obligations;
- (b) copies of documents lodged with the ASIC in relation to the Company (not being documents referred to in section 1274(2)(a) of the Corporations Act) may be obtained from, or inspected at, the offices of the ASIC; and
